EDUCATION

Bachelor of Science: Construction Management

Utah Valley University

Graduation December 2025

EXPERIENCE

VDC Engineer

Okland Construction

May 2025-Current

- Coordinate architectural, structural, and MEP models in Revit to support integrated design development and interdisciplinary collaboration.
- Perform 3D system coordination and clash detection to identify design conflicts and improve constructability prior to construction.
- Maintain and update federated BIM models to ensure consistency with project BIM standards and evolving design documentation.
- Collaborate with architects, consultants, and trade partners to support design coordination, model-based problem solving, and preconstruction planning.

Project Manager/Assistant Designer

Lyon Interior Design

August 2023-September 2025

- Produced and revised residential interior design drawings in AutoCAD, including plans, elevations, and detailed design documentation.
- Conducted field measurements and site documentation to translate existing conditions into accurate architectural drawings.
- Assisted in coordinating design revisions between designers, site conditions, and subcontractors throughout project development.
- Supported material selections, quantity takeoffs, and budgeting by extracting drawing-based design information.

Design Consultant and Sales Representative

Wolfe Lighting Inc.

May 2022-September 2022

- Serviced and consulted with customers daily
- Consulted with homeowners to create custom lighting packages
- Contacted subcontracts to ensure appropriate delivery and installation were completed timely and smoothly
- Associated with over 100 manufactures and gained understanding of supply chain processes

SKILLS & ABILITIES

- Four years of experience in Revit
- Three years of experience in AutoCAD
- Two years of experiences in Adobe Suite (Photoshop and InDesign)
- Student Certification in BlueBeam University and Procore
- Proficient in Microsoft Office, Fuzor, Lumion, Procore, BlueBeam
- Passionate about the intersection of architecture, construction, and interiors
- Strong interest in organization, systems, and design coordination to support efficient project workflows
- Demonstrated adaptability collaborative problem-solving in design and construction environments
